Hon. Commissioner of Patents
and Trademarks
Washington, D.C. 20231

Dear Sir:

The undersigned declares as follows:

1. We are the originally-named inventors of the above-identified patent application.
2. Sometime in the period between March 19, 1992 and April 28, 1992, we received copy of the above-identified patent application, along with a request to review the application and declaration, and, if we found them to be in order, to sign the declaration.
3. We reviewed the patent application and declaration. Upon this review, it was determined that the patent application described a first embodiment in which the housing can be cut to achieve rotation and another embodiment in which the housing can be provided in two or more separate pieces so that it is not necessary to cut the housing in order to perform rotation. It was determined that the claims in the application covered the first embodiment but not the second embodiment, and that it was desirable to have claims covering both embodiments. It was also determined that the second embodiment was at least partly a

contribution of Richard D. Fields, who was not originally-named as an inventor.

4. These items were communicated to our patent attorney, Richard L. Hughes of Townsend and Townsend, on or about April 28, 1992. Mr. Hughes informed us that since the correct inventors were named for the claims currently in the patent application, it would not be improper for us to sign the declaration and that he would attend to making the proper amendments to the application and also adding Mr. Fields as an inventor.

5. On or about June 3, 1992, we signed the declaration and power of attorney for the above-identified application.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and, further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
